

Quality, Environment, and Safety are for Casati more than a policy, they embody the Company's consciousness of operating in compliance with laws, regulations and ethics.

In a globalized market of services and products, Casati aims to guarantee the full Customer's satisfaction.

**QUALITY** Casati's quality policy has research and development, and process engineering, together with interactive customer Co-design, at the center of a constant improvement of both culture and technology.

**ENVIRONMENT** Casati is aware of its interdependence with the region and the community in which it operates, pursuing goals of environment protection and development, compatibly with social and economic growth. Casati assure the environment protection in compliance with all the regulations in force.

**SAFETY** Human resources are the Casati itself. Through the skills enhancement, training, and continuous improvement, Casati defines its economic and professional growth targets, in a safe environment, where prevention and protection are the basis to seize the best opportunities to evolve.

**CUSTOMER** The Customer of Casati has the opportunity to work with a reliable and enthusiastic partner that is open and transparent, with the desire of exchanging its knowhow

To reach and keep these objectives, Casati ensure that:

- The Customer requirements on products and services are identified, defined, and respected
- Current laws and regulations are respected
- Organizational and relational requirements are reached to spread the culture and teach the contents of the quality, environment and safety policy to the whole organization

**It's all of us**

Enrico Casati
